Vol. 29, Nos. 1–3

Preface vii

Session 1. Machining, Grinding, Cutting & Welding

On-line tool-wear monitoring using a PC,
K.S. Lee, L.C. Lee and S.C. Teo 3
Assessment of simple flow-stress relationships using literature data for a range of steels,
K.P. Rao and E.B. Hawbolt 15
A quick-stop device for orthogonal machining,
S.H. Yeo, W.W. Lui and V. Phung 41
Calculation of temperature distributions in machining using a hybrid finite-element–boundary-element method,
A.A.O. Tay and K.H. Lee 47
Application of Taguchi methods in the optimization of the laser-cutting process,
S.C. Tam, Lennie E.N. Lim and K.Y. Quek 63
Micro-computer-based optimization of the surface grinding process,
X.M. Wen, A.A.O. Tay and A.Y.C. Nee 75
Deformation behaviour and microstructure–mechanical-property correlations for RR58 aluminium alloy,
K.P. Rao and K. Sivaram 91
Development of an integrated CAD/CAPP/CAM system for turning operations,
S.W. Lye and S.H. Yeo 103
A study on the appropriate usage of different tool materials,
M. Rahman, K.H.W. Seah, T.N. Goh and C.H. Lee 119
The effects of process variables on the bead width of submerged-arc weld deposits,
L.J. Yang, R.S. Chandel and M.J. Bibby 133

Session 2. Forming & Casting

Some considerations in the design and automatic staging of progressive dies,
A.Y.C. Nee and K.Y. Foong 147
Friction-aided semi-continuous extrusion of aluminium rod using a urethane clamp,
S. Thiruvarudchelvan 159
Computer-generated flat-pattern development of heating, ventilating and air-conditioning ductings,
H.T. Loh, A.Y.C. Nee and T.C. Chong 173
Statistical classification of chemical composition and microstructure as a function of tool-steel deformability,
C.C. Szilvassy and W.C.K. Wong 191
An investigation into the ball burnishing of an AISI 1045 free-form surface,
S.S.G. Lee, S.C. Tam, N.H. Loh and S. Miyazawa 203

Elsevier Science Publishers B.V.

Crack susceptibility of electro-discharge machined surfaces,
L.C. Lee, L.C. Lim, Y.S. Wong and H.S. Fong 213
Application of a solidification model to the casting of an aluminium brake drum,
Y.W. Chan 223
The effects of using coated tools in the deep drawing of aluminium,
K.S. Lee, K.H.W. Seah and C.Y.H. Lim 235
The production of aluminium alloy composites using a cold isostatic press and extrusion approach,
H.F. Lee, F. Boey, K.A. Khor, M.J. Tan, J. Gan and N.L. Loh 245
Cavitation during superplastic forming of two-phase alloys,
H.M. Shang, F.S. Chau, V.P.W. Shim, C.J. Tay and S.L. Toh 255

Session 3. Materials Processing

Production of fine metal and ceramic powders by the plasma melt and rapid solidification (PMRS) process,
K.A. Khor 267
Titanium in cardiac valve prostheses: A discussion on the compaction, compressive and tensile properties of pure titanium powder metallurgical compacts,
K.H.W. Seah, R. Thampuran and S.H. Teoh 283
Optimisation of materials processing using AutoCAD,
O.K. Tiow, K.P. Wah and W.C. Guang 293
Effect of residual stress on the fatigue performance of the surface of a ballised hole,
M.O. Lai, A.Y.C. Nee and J.T. Oh 301
High-pressure microwave curing process for an epoxy-matrix/glass-fibre composite,
F. Boey, I. Gosling and S.W. Lye 311
Fracture and creep properties of flow-formed tubes,
M.O. Lai and K.S. Lee 321
Bi-Sr-Ca-Cu-O superconducting films prepared by in-situ melting,
W. Zhu, P.A. Metcalf and H. Sato 331
Processing of expandable polystyrene using microwave energy,
H.Y. Yeong and S.W. Lye 341
Simulation accuracy of a contraction flow of viscoelastic polymer liquid in liquid molding processes,
H. Gong and S.I. Güçeri 351
Metallo-organic decomposition technology for PZT films in memory applications,
W. Zhu and R.W. Vest 373
